

EASTER BUNNY BARGAINS

the TV game
that's
also a
personal
computer
years ahead!

The Dick Smith Wizzard uses the very latest technology available. Most of the games around were designed two, three or more years ago. And at the speed electronics is advancing today that's a long, long time. The design of the Dick Smith Wizzard is absolutely up-to-date: it was finalised only a few short months ago. It is therefore far more advanced than the older machines.

**FIRST SHIPMENT
SOLD OUT IN WEEKS!
NOW BACK IN STOCK!**

Possibly the most fantastic feature of all: you can turn the Dick Smith Wizzard into your own personal computer – in an instant – simply by plugging in the optional low cost computer cartridge!

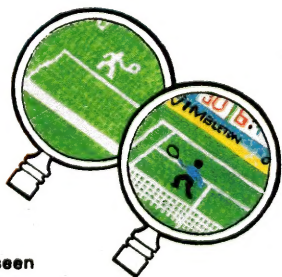

You'll be able to learn how to write your own programs: home economics, financial records, recipes, school work . . . you can even program and run your own games! No other video game offers this incredible option – because no other video game can! It's all made possible by the incredibly powerful 6502 microprocessor used in the Dick Smith Wizzard (exactly the same microprocessor used in the world famous Apple computer – and that costs over \$1000!)

Compare the quality

The Dick Smith Wizzard has really outstanding picture quality! It's resolution (49,128 pixels) is far greater than the most popular game on the market. The result – a fantastically better picture!

Forget about those 'stick men' you've seen before: with the Wizzard you get real three-dimensional figures.

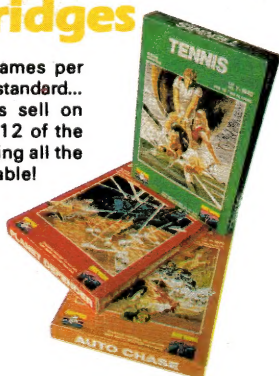

Space age controllers

Most video game controllers have only eight possible movements. But instead of a pair of simple 'sticks' the Wizzard comes with special guiding devices. With 16 (yes, 16) different positions available – plus up to 48 keys which can also be used!

Fantastic games cartridges

The Wizzard is so advanced you can play up to 32 games per cartridge...one player, two players, amateur, professional standard... you choose yourself. The most popular video games sell on average 6 cartridges per machine. Well, we have over 12 of the most popular cartridges available NOW – and more coming all the time! So you'll always have plenty of new games available!

the Amazing DICK SMITH

ANY SPECIAL PRICES OR OFFERS IN THIS MAILER CURRENT ONLY FROM 21st MARCH TO 16th APRIL 1983

Dick Smith's FUN WAY INTO ELECTRONICS

FLASHER \$2.95

A really simple kit to make electronic jewellery, or a burglar alarm warning light, etc. Cat K-2621

DING-DONG DOORBELL \$4.50

A great doorbell — uses a simple circuit based on an integrated circuit. Cat K-2622

MORSE CODE TRAINER \$4.50

Learn Morse Code with this little beauty (and the book tells you the right way!) Cat K-2623

UNIVERSAL TIMER \$5.50

Use as an egg timer — or in the darkroom — or anything else you want to time Cat K-2624

ELECTRONIC DICE \$4.95

Great for games — completely random number selector from 1 to 6. Cat K-2625

MONOPHONIC ORGAN \$7.95

Two octave organ you can actually play tunes on! Take it anywhere. Cat K-2626

POCKET TRANNIE \$7.95

Simple to build — and it's nice and small. Listening is so much more fun! Cat K-2627

TOUCH SWITCH \$5.50

Simply touch it to switch something on, touch it again to turn off. Or 'on while touched'. Cat K-2628

MOZZIE REPELLER \$4.95

Will it repel mosquitos? University research suggests these devices work. Find out yourself! Cat K-2629

INTERCOM AMPLIFIER \$6.50

Use as an intercom, or as a general purpose amplifier. Easy to add on to other projects. Cat K-2630

WIRELESS MIC \$6.50

It really works! Transmits over a short range, and can be picked up on any standard FM receiver. Cat K-2631

LIGHT ACT. SWITCH \$5.50

Has numerous applications in burglar alarms, night light switches, etc Cat K-2632

METAL/PIPE LOCATOR \$6.50

Join in the gold rush! Or look for pipes, & cables in walls, etc. Includes coil wire, no former. Cat K-2633

SOUND ACT. SWITCH \$6.95

Use as a legal telephone bell extender, or in security applications. Versatile circuit. Cat K-2634

HOME/CAR ALARM \$6.50

Very practical project which can be used in the home or car. Safeguard your property! Cat K-2635

ELECTRONIC SIREN \$4.95

Use with above alarm — or anywhere else a siren sound is needed. Cat K-2636

LED LEVEL DISPLAY \$8.95

Shows the peak level of your hi fi or other amplifier. Why risk damaging valuable speakers? Cat K-2637

INTERCOM UNIT \$8.95

At last! You can build an intercom that really works! Great for the home, office, etc. Cat K-2638

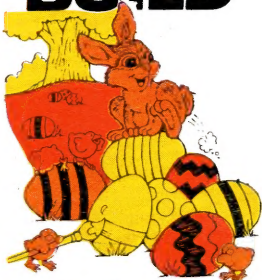

COUNTER MODULE \$7.95

Find out how digital IC's work — and use this little project as a lap counter, etc. Cat K-2639

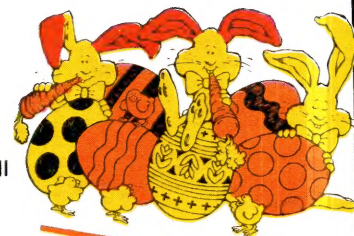

SHORT WAVE RECEIVER \$6.95

Listen in to the exciting short wave radio bands. Ingenious circuit uses one digital IC! Cat K-2640

BUILD THESE EXCITING PROJECTS FROM FUN WAY VOL II

Please note: These kits DO NOT include instruction: all necessary information is contained in 'Fun Way Into Electronics, Vol II'

50,000
SOLD!

FUN WAY INTO ELECTRONICS, VOLUME II

Another incredibly popular book — the much requested follow-up to Fun Way 1. 'Fun Way II' is more advanced, getting right into real project building. All projects are made on printed circuit boards, and components are soldered into place.

Don't know how to solder? Don't worry: Fun Way II shows you! And has lots of other information besides. This is the book that is widely used as a textbook in schools and colleges.

BUDGET HOBBYISTS METER IDEAL FOR THE CAR

The one the technicians use! 20,000 ohms per volt sensitivity - ideal for hobbyists, constructors, etc. Mirrored scale for clarity. Cat Q-1020

\$21.50

A COMPLETE TEST BENCH!

Yes! This incredible multimeter looks pretty normal, but check it out: of course it does all the usual multimeter measurements, including AC & DC current to 10A... but it also checks transistors, diodes and capacitors! Unique gain and leakage check for transistors in both polarities is a big advantage - and it also has an inbuilt oscillator for checking capacitors (in two ranges; up to 50pF and up to 50uF). Why buy an ordinary high impedance multimeter when you can have one of these beauties for so little extra. Cat Q-1140

100K OHMS PER VOLT SENSITIVITY TOO!!!

ENGINEERS SPECIAL

TECHNA T/R METAL DETECTOR

The Techna T/R is made in the USA by the world's largest metal detector company. It is the ideal unit to throw in the car when you go away for a weekend or even when you go on holiday. What better way to pay for a holiday than to find a hidden cache of treasure or a gleaming nugget of gold! You can have endless hours of fun and the whole family can join in as well. This detector features an integrated circuit discriminator designed by a brilliant US ex-military engineer. Cat. Y-1066

Yes! A true T/R type — not a 'toy' BFO model!

What an amazing invention! Inside this 300mm (1ft) metric/imperial rule you'll not only find an accurate LCD digital clock (everything has them these days!) but a full function memory LCD calculator too!!!! Now that's what you would call a good rule to keep! (P.S. There's also a handy metric conversion table on the rule too, but that's hardly worth mentioning!)

THE AMAZING CRAIG Language Computer

The computerised language translator. Fantastic value for anyone dealing with people overseas (businessmen?) students studying another language and, of course, tourists. Translates words and phrases from one language to another (depending on modules installed). Worth buying in case you EVER go overseas!

AMAZING TECHNOLOGICAL BREAKTHROUGH!

A CLOCK THAT TALKS!

Imagine waking up tomorrow morning to a pleasant 'Good morning'...

After grabbing for the blanket to cover yourself (or hiding your curlers) you'll look around the room to find out who it is.

Relax! It's just your talking alarm clock from Dick Smith. Yes! this clock actually talks! No tapes, no records: it uses computerised circuitry to announce the time to you. Here's what else it can do: ★ Two alarm setting, with 'snooze' function. ★ Present time announcement. ★ Two elapsed time announcements. ★ Zero second adjustment. ★ Display brightness and volume controls.

SYSTEM 80 blue label

Cat X-4005

New features lower price!

Australia's fastest selling computer is now even better! The new 'Blue Label' System 80 computer from Dick Smith now includes features normally found on computers costing hundreds of dollars more...

Look at what you get in your new 'Blue Label' System 80:

- ★ Inbuilt cassette recorder.
- ★ Inbuilt television modulator (connects to any TV set)
- ★ Inbuilt speaker for sound effects programs.
- ★ Huge 16K memory (externally expandable to 48K)
- ★ Full upper/lower case character set.
- ★ Flashing cursor and screen print facility.
- ★ Popular Microsoft BASIC (compatible with TRS-80/II programs)
- ★ Monitor program (you can program in machine language)
- ★ And, of course, the famous Z-80 microprocessor - the most popular computer chip in the world.

And there's never been a better time to buy a superb System 80 computer from Dick Smith.

AUSTRALIA'S FASTEST SELLING COMPUTER OVER 13,000 SOLD!

NEW MODEL!

WE HAVE SOLD THOUSANDS OF OUR SINGLE TAPE ANSWERING MACHINES, NOW WE HAVE A...

TWO TAPE PHONE ANSWERING MACHINE

This machine offers the incredible advantage of a two-tape system: one tape used for your message, the other for incoming recordings. So instead of recording your message up to 30 times (which you must do in a one-tape system) you make just one recording. And if you want different messages on different occasions, simply swap the tape! It also features the optional remote Beeper which allows you direct access to recorded messages.

★ Max. 3 minute announcement. ★ Switchable erase - auto electronic erase or record over existing messages. ★ Monitor Mode - lets you hear who's calling. ★ Uses standard micro-cassettes. ★ VOX (voice activated). ★ Fail safe - unit tells you if something is wrong. ★ Announcement monitor - verifies outgoing messages is working. ★ Command confirmation (no guessing if unit received instruction). ★ Last message signals - tells you when it's the last message received. ★ Lighted mode indication. ★ Cue - Review messages at high speed.
